

Ozone International

Industry-Proven Ozone Cleaning and Sanitizing Systems

FOR IMMEDIATE RELEASE

**OZONE INTERNATIONAL LLC RECEIVES 4TH PATENT
FOR OZONE-BASED CLEANING TECHNOLOGIES**

Bainbridge Island, WA – March 2007 – Ozone International LLC, the global leader in ozone-based cleaning & sanitizing systems for the food & beverage industries, announced today that it has been granted a new U.S. patent related to its WhiteWater Cleaning & Sanitizing Systems. This new U.S. patent is the 4th patent Ozone International LLC has received related to its WhiteWater Cleaning & Sanitizing Systems.

This newly-issued patent covers systems for cleaning and sanitizing using a low-pressure ozone/water stream in conjunction with a high-pressure water stream. According to CEO Colin Chapman, this patent is yet another step in the Company's efforts to protect the technologies used in its WhiteWater Cleaning & Sanitizing Systems.

The Company's new patent, numbered 7188632, was granted by the U.S. Patent & Trademark Office on March 13, 2007. The Company's other patents, numbered 7086407, 7087123, and 7087124, were granted by the U.S. Patent & Trademark Office in late 2006.

About Ozone International

Ozone International is the global leader in ozone-based cleaning & sanitizing systems for the food & beverage industries. The company's WhiteWater Cleaning & Sanitizing Systems use a patented combination of cold water & ozone to give food & beverage processors worldwide a chemical-free cleaning & sanitizing solution that maximizes savings, productivity, and quality.
